OSD Menu Customization

Customized OSD menus are possible for our PRISMA family controller boards! From now on the Prisma is more than a RGB/DVI/HDMI/Video-board, **it is now an interactive control unit.**

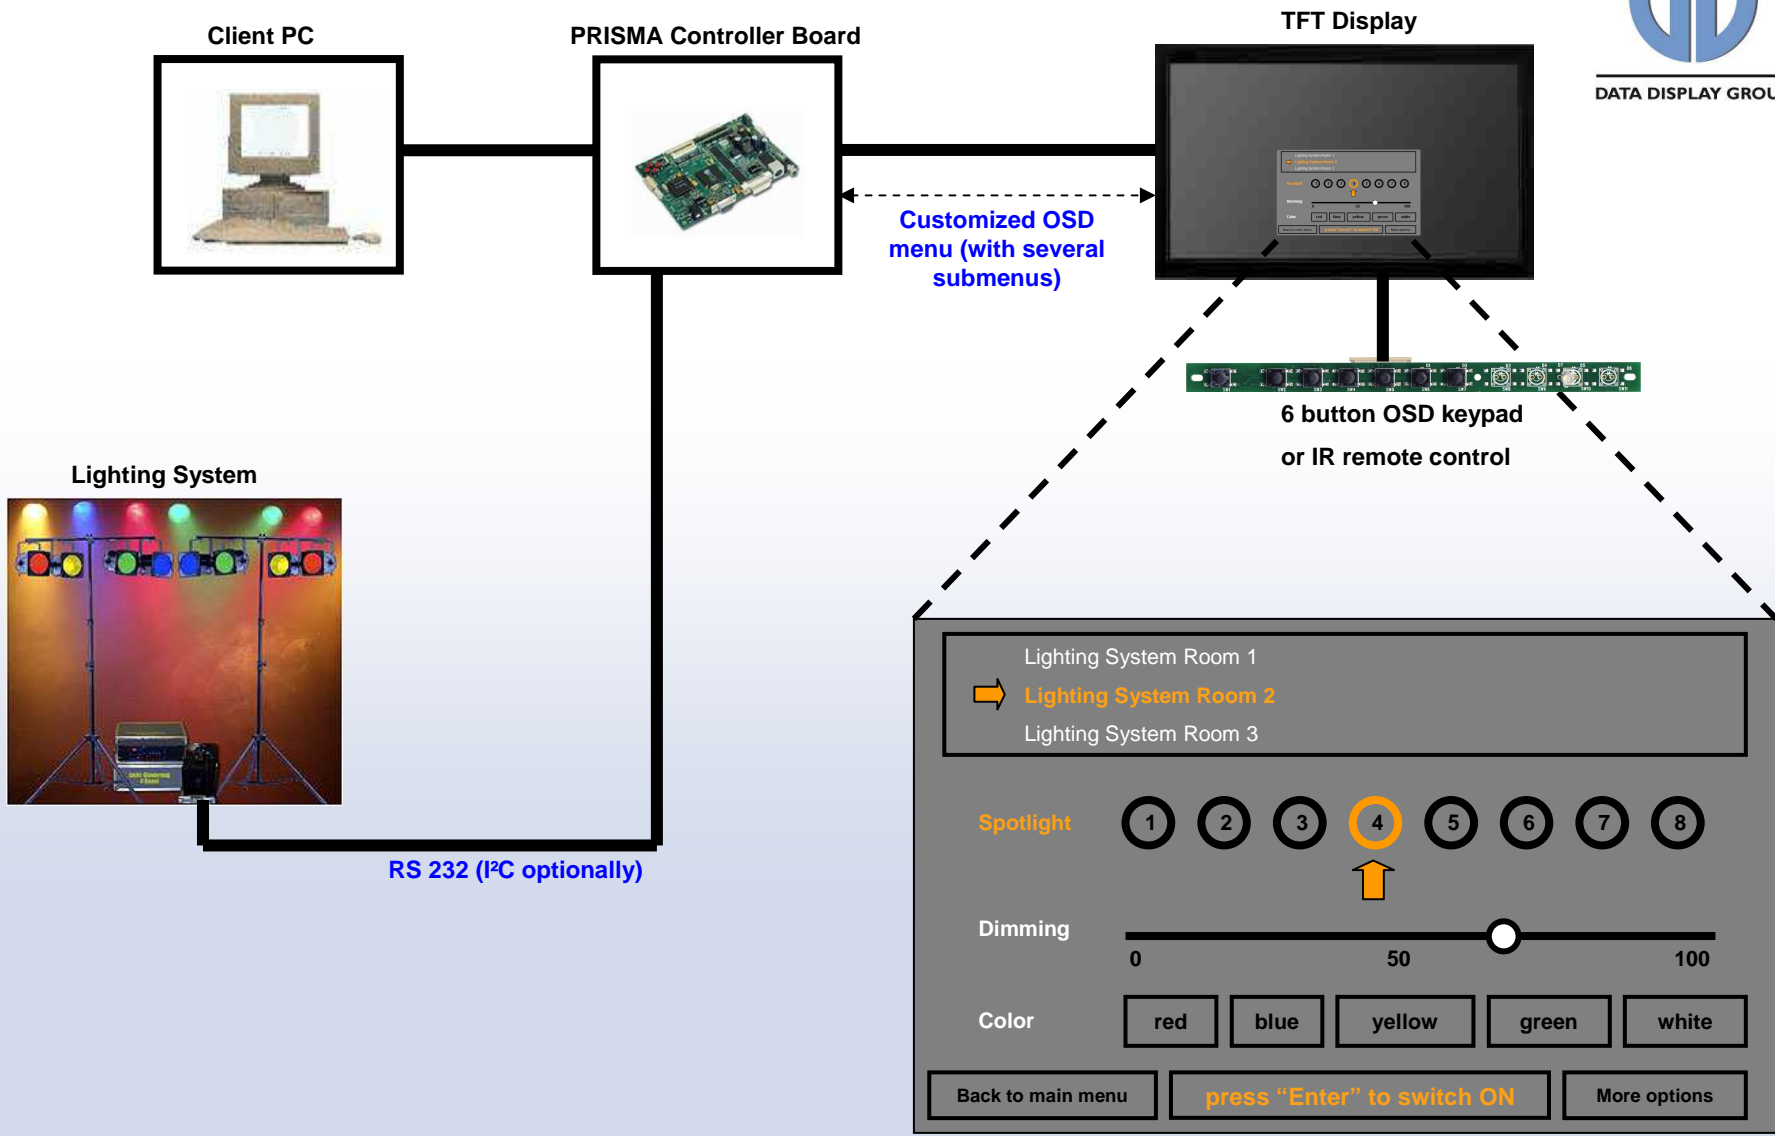

The control of basic settings within your application (industrial, multimedia, digital signage, automation technology, etc.) via the PRISMA OSD menu is now possible.

Contact us for more information how to integrate this easy to use and cost-effective feature into your application!

Please find an illustration on the next page!
